Introduction

Chailey Heritage Foundation encompasses Chailey Heritage Residential, Chailey Heritage Futures (16-25 year old transition provision) and Chailey Heritage School, a non-maintained special school also located on our 18-acre site, set in the heart of the beautiful Sussex countryside. Chailey Heritage Residential is a nationally recognised registered children's home designed for children and young people up to the age 19 with complex physical disabilities and health needs.

We are recognised as one of the UK's leading provisions for children and young people with neurological motor impairment such as Cerebral Palsy and acquired brain injury. We have a renowned reputation for our dedication and work in supporting young people with their communication, sensory needs and development of independence through powered mobility.

The majority of the young people are in full-time education, on-site at Chailey Heritage School but we also support young people attending other schools. We offer flexible residential provision ranging from termly, weekly, fortnightly to living with us all year, as well as short break packages. Short breaks and residential support packages can be arranged for young people who are not pupils at our school, either following referral from their Local Authority or from private funding.

Caring for Young People

Chailey Heritage Residential provides care and support for children and young people up to the age of 19 with complex physical disabilities; many young people have communication and sensory impairment combined with complex health needs, which are sometimes associated with learning difficulties. The young people's needs are met by a multidisciplinary team through an individually and bespoke, person-centred programme.

This may encompass:

- communication skills
- switch work (including environmental controls)
- ICT and technology skills
- mobility training (including powered mobility)
- 24-hour posture management programme
- sensory needs programmes and assessments
- specialist eating and drinking programmes
- medical and nursing cover
- personalized physiotherapy, speech therapy and occupational therapy with weekly sessions with a trained therapist

Our aim is to provide a stimulating and inclusive environment where all young people are given every opportunity to make progress towards fulfilment and develop life skills in preparation for the transition to adulthood and the wider community.

Ethos and Approach; The Outcomes for Young People

Our vision is clear and simple:

We will never, ever give up working with children, young people and their families to empower them to make their own choices at every stage in life.

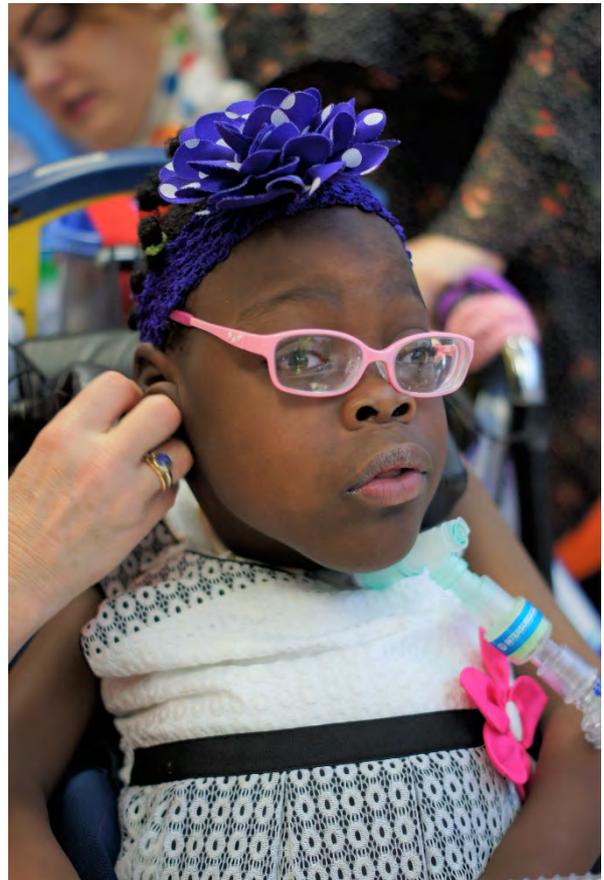

We will nurture and support the young people and their families to equip them with the essential life skills to take them through childhood, into adult life and beyond to a wider community.

Each young person has access to the following during their time with us:

- A broad, balanced and relevant curriculum to meet individual needs
- A stimulating and enjoyable residential environment
- Recognition and development of their own individuality
- An environment where they can feel safe, confident and well cared for

Our Chailey Heritage Charter states that all children and young people have the following fundamental rights:

- ✓ To be safe
- ✓ To be listened to
- ✓ To be respected as an individual
- ✓ To feel good about themselves
- ✓ To be as fit and healthy as possible
- ✓ To be encouraged to develop

Enjoying and Achieving

The activities within the bungalow whether before and after school, during the weekends or holiday periods cover specific areas of the curriculum leading to a joined up approach to learning across school and bungalows. The environment on the bungalow provides the opportunity to work more closely on areas such as Personal and Social Health Education (PSHE), independence, self-help and the development of life skills.

Evening and weekend activities may include Scouts, swimming in our hydro pool, bike riding on specially-adapted bikes, wheelchair football, table cricket, independent driving using powered wheelchairs on our special track system, spending time in our sensory studio with interactive magic carpet, as well as shopping trips and outings to local places of interest.

Each summer the Scout group goes away on an adventure holiday, which gives the young people the opportunity to try a wide range of new and exciting activities such as abseiling, rock climbing and canoeing.

The young people access the wider community on their many trips in our specially adapted mini buses. Outings are valuable in providing the young people with real experiences and promoting their interests and hobbies as well as enabling them to be a part of their communities.

Trips have included banger car racing, music concerts, clubbing, shopping trips, bowling, cinema and theatre visits and the Horse of the Year Show.

Culture and Religion

All young people have the right for their religious and personal/cultural beliefs and preferences to be recognised and respected. During the admission process parents, families and young people are consulted about their religious beliefs and support is offered to enable a young person to attend services held in the local community should they wish to do so.

Contact with Family and Friends

Young people and their families and friends are encouraged to be in close contact throughout their stay, unless there are legal reasons why this is not permitted. All young people have access to a speaker telephone with a dedicated telephone line for friends and families to use.

The young people have access to the internet to send and receive emails with computers available for their use. The young person's keyworker is responsible for keeping in touch with parents/carers and coordinating communication between the young person and their family by their home diary and via email.

We have Skype set up for the young people as a means of keeping in touch with their family and friends. Each bungalow has an iPad, which is also available for FaceTime calls.

We have a dedicated family room on-site for parents/carers and friends to spend time with the young people away from the bungalows that is accessible in the evenings and weekends. Friends and families are very much encouraged to attend coffee mornings and visit in the evenings, weekends and during the holidays.

Parents/carers may wish to join Chailey Heritage Information Parent/Carer Support (CHIPS) a group created by parents for parents offering support, encouragement and information sharing with families/carers in similar situations.

Chailey Heritage Foundation has two dedicated bedsits located on-site for visiting families to book for a small fee, should they wish to stay overnight.

Consulting with Young People about their Care

Each young person is given support to maximise their independence, maintain their privacy and is consistent with their personal beliefs, preferences and support plan. The degree of support required is agreed with the young person and they are encouraged to be as self-managing as possible.

The young people are encouraged to express themselves in a wide variety of ways and to a range of different people. Complaints or concerns can be made through their keyworker, School Council or by way of an independent advocate. Matters are then addressed and fed back to the young person and kept in their support plan.

Advocacy

Chailey Heritage Residential employs an independent advocate from an outside agency who visits the bungalows regularly. The service provides support to all young people covering a wide range of issues that young people may wish to raise whilst supported by their keyworker.

Communication

The residential team work with the speech and language therapists to ensure the young people have access to communication systems such as Sign-along, VOCAs, Chailey Communication System books, etc. All support staff receive training for Sign-along from our own qualified Sign-along Tutors. Staff also have training by qualified speech and language therapists in how to access and input new words and information for the young person's VOCAs, specially designed communication devices such as TELUS, and Eye Gaze.

Keyworkers

Each young person has an identified keyworker who is responsible for liaising with his or her parents/carers, social worker, clinicians, therapists and their school.

The keyworker maintains the young person's support plan and attends clinics and reviews as part of the multidisciplinary team. They will also write a residential report for reviews and ensure any actions are followed through.

The residential keyworker will also work closely with a young person's school linkworker sharing key information to ensure consistency of care and support. Each young person has a home/school/bungalow diary and information is shared, if appropriate, with parents/carers.

Questionnaires

Seeking the opinions and views of the young people, parents/carers/families and Local Authorities is an important part of the work we do. Questions for the young people are presented in an appropriate format to meet a young person's needs. Support is given by staff and/or an independent advocate to best support a young person to answer the questions. The parents' questionnaire covers all aspects of Chailey Heritage Residential including those linked to Ofsted's Self Evaluation Form.

The Complaints Coordinator and Quality Assurance Manager review all responses and comments made by the young people. In the event a concern is highlighted, we will investigate the issue and resolve the concern as soon as possible.

Reviews

A young person's keyworker will liaise closely with them and their family to ensure they are given the opportunity to participate fully at any of their reviews. These will include multidisciplinary reviews, local authority or LAC reviews and annual school reviews. A copy of the minutes will be sent to the parents/carers who will be fully involved in the outcomes, when appropriate. Copies of all the minutes will be held in the young person's support plan.

Young People's Guide

A Young Person's Guide is given to each young person when they come to stay at Chailey Heritage Residential and within it is a photo page of all the staff who will be caring for them. This guide gives general information and describes the bungalows and activities offered.

Promoting Rights, Equality and Anti-Discriminatory Practice

All young people are treated with respect, dignity, asked for their views, listened to, included in decisions about how they are supported and cared for, and involved in decisions about their future. All staff are encouraged to develop trusting relationships and should strive to make Chailey Heritage Residential a positive experience for all the young people.

We will pursue equality of opportunities for young people through:

- ✓ sensitivity towards individual needs, characteristics, backgrounds and aspirations
- ✓ provide support for each person's right to control his or her own life
- ✓ fair and even application of policies and procedures
- ✓ access to information through advocacy and training, leading to empowerment and informed choices
- ✓ opportunities for full participation in decision-making throughout the organisation;
- ✓ constant monitoring and reinforcement of this policy

Accommodation – *Brambles, Camelia and Chestnut*

Our accommodation is provided in three purpose built bungalows, Brambles, Camelia and Chestnut, which are designed to meet the needs of the young people. We promote a caring '*home from home*' environment essential to a young person's feelings of security, happiness and well-being. All of the bungalows are fully wheelchair accessible with specialist overhead tracking and hoisting system.

Each of our bungalows can accommodate up to eight young people in two double rooms and four single rooms with specially adapted en-suite facilities. We aim to create a stimulating residential environment and all bungalows are equipped with SKY®, Play Stations®, Nintendo Wiis®, iPads, computers and touch screen computers for the young people to use.

Young people are encouraged to make choices and decisions about all aspects of their lives whether this is with their personal appearance or how they wish to spend their leisure time. Young people are also given opportunities to help with various aspects of running a home, such as planning and preparing meals, keeping their rooms tidy and making their beds.

Young people are encouraged to personalise their rooms, such as posters, photos and treasured possessions such as DVDs, CDs, favourite toys, etc.

We know how important it is for each young person to be allocated the bedroom and bungalow that best meets their needs. To facilitate this, we complete an impact assessment that takes into account the needs of the person moving in as well as those already using the bungalow.

We will then liaise with the young person and their families to provide the best possible placement.

Short breaks can be offered to young people who are not pupils at the school on receipt of a referral from a Local Authority or by private funding.

Placements/Assessments

Placements and referrals may take place throughout the year by way of a multidisciplinary team assessment to include post-operative care. Assessments are carried out with the young person and their families in conjunction with our partners Sussex Community NHS Foundation Trust to ensure the young person's needs can be effectively met by the service and resources available.

We aim for assessments to take place on the relevant bungalow so the young people and parents can meet House Managers and get a feel for the bungalow. We do what we can to meet a young person's peer group needs within a relevant bungalow. Some young people start their package initially with taster sessions so they can get to know the bungalow staff and other young people residing.

Assessments cover the educational and clinical needs as well as any behavioural needs there may be, if assessed to be suitable, a place will be offered. Should a young person be assessed as needing behavioural support, a behavioural support plan and staff training will be provided by our partners, Sussex Community NHS Foundation Trust to ensure all of the young people in our care are safe at all times.

Emergency Provision

If circumstances require, we can accommodate young people for emergency stays. The bungalows have emergency beds for such situations. The criteria would be if there were a safeguarding concern, emergency at home, etc. Our partners, Sussex Community NHS Foundation Trust would be informed of the situation and joint funding would have to be agreed and in place prior to the start of the placement.

Location of Chailey Heritage Residential

Chailey Heritage Residential is set in 18 acres of beautiful countryside, located in a rural part of East Sussex between the towns of Haywards Heath to the north and Uckfield to the south.

The site is located on the A272 with Chailey Common to the front and rear of the site. The nearest villages are Scaynes Hill to the north, approximately 2 miles distant and North Chailey to the south, approximately 0.7 miles distant. Both villages have garages, public houses and local shops.

Safeguarding: Preventing Bullying

Chailey Heritage Residential works in partnership with Chailey Clinical Services (part of Sussex Community NHS Foundation Trust) to provide a safe environment for all the young people. Each organisation has designated safeguarding officers who will liaise with local authority as the lead agency with any concerns.

All staff are trained in safeguarding the young people and whistle blowing. This enables all staff to be accountable for their own working practices. The staff are supported to discuss any concerns and we actively encourage openness in this area. The Safeguarding Team for Chailey Heritage Residential/Chailey Heritage Foundation are aware of Statutory Notifications under Regulation 40 of the '*The Children's Homes Regulations and Quality Standards*'. The team are aware of how to contact Ofsted should the Registered Manager not be available. There is also a system in place to notify Ofsted within 24 hours of any significant events that includes weekends and holiday periods.

Our Safeguarding Policies are available to read on our website: www.chf.org.uk. There are also posters across the entire site with information and contact details for the Senior Safeguarding Team for anyone with a concern and how to contact one of the team.

Any young person who discloses abuse will be listened to and fully supported. Chailey Heritage Residential actively works in partnership with families and has consideration for anti-oppressive practice, young people's rights, equality and valuing diversity.

Preventing Bullying

Chailey Heritage Residential is committed to providing a caring, friendly and safe environment for all young people so they can achieve their full potential in a relaxed and secure atmosphere. As young people are always supervised, it is unlikely that bullying would go unnoticed.

Staff and children understand that bullying is unacceptable. If bullying occurs, young people are encouraged to use their means of communication to convey specific incidents to a trusted member of staff.

The young people are aware that bullying will not be tolerated and will be dealt with promptly and effectively.

Anti-bullying activities have been designed for the young people to best support them and to develop their understanding of:

- ✓ What bullying is
- ✓ How bullying feels
- ✓ Why people bully
- ✓ How can bullying be prevented
- ✓ How bullying will be responded to
- ✓ How young people can use their social, emotional and behaviour skills to tackle bullying

Missing Young People

In the event of a missing young person from one of the bungalows, the shift leader is responsible for an initial search of the bungalow and adjoining areas. The shift leader will designate another member of staff to phone the managers of other bungalows who will undertake a search of their areas. Between 9 am and 4pm term-time the senior person will also phone the educational department the young person is based and the school office so that a search can be made of the educational buildings. Chailey Clinical Services will also be phoned to ensure the young person is not attending a health or clinical appointment.

If the young person is not found after 10 minutes:

- ✓ A search should be undertaken of local surrounding areas and grounds including Chailey Clinical Service
- ✓ The Head of Residential Operations or in his/her absence a House Manager or if out of hours the Senior Manager on-call should be phoned
- ✓ The Head of Residential Operations or House Manager or, if out of hours, the most senior member of staff on-site should ensure that they are co-ordinating the search and that they have telephone/mobile phone and administration support from another member of staff
- ✓ All staff should be confident that they have sufficient information to conduct the search

If the young person is not found after 20 minutes:

- ✓ The Senior Manager will telephone the police
- ✓ Senior Manager will inform the young person's parents and all other relevant people including the young person's placement authority

Once the young person has been found and is safe a full investigation would be instigated by the Head of Residential Operations to prevent a recurrence. This will include regular liaison and communication between the police and referring/involved agencies and the young person's parents/carers, if applicable.

Written records will be kept when a young person goes missing:

1. detail of action taken by staff
2. the circumstances of the young person's return
3. any reasons given by the young person for being missing from the home
4. any action taken in the light of those reasons.

Information will be shared with the police, responsible authority and where appropriate, their parents.

Dealing with a Complaint

When complaints are made, we will respond speedily and in a way that illustrates our wish to offer parents/carers and young people the best service possible with the highest quality of care. Formal complaints are not common at Chailey Heritage Residential and most arise from a misunderstanding, which can be cleared up through informal discussion and will be noted.

Chailey Heritage Foundation has a policy with clear guidelines and timescales for responses to formal complaints. All such instances will be thoroughly investigated with the outcomes fed back to the complainant. The policy covers procedures for any instances where the complainant is not satisfied and wishes to seek resolution from an independent person. Should any complaint highlight an issue or a procedure that could be improved upon, Chailey Heritage Foundation has a Lessons Learned process to ensure positive changes are made. This policy is available to read on our website www.chf.org.uk.

Complaints or concerns can be made through the young person's keyworker, the House Manager, the School Council or the independent advocate; matters once addressed are then fed back to the young people. Our Foundation Coordinator/Complaints Coordinator is responsible for organising our response to complaints and the Head of Residential Operations may also be contacted in the event of raising a complaint.

Positive Behaviour

Surveillance and Monitoring Young People

Cameras

The use of cameras connected to CCTV may be used for the purpose of safeguarding and promoting the welfare of a young person if an assessment indicates a high level of risk. This is done to ensure their continued safety. Parental permission and consents from the placing authority are always obtained in this instance and kept in the young person's support plan. CCTV does not substitute the regular half hourly, or in some cases quarter hourly checks that take place throughout the night. The system is to aid monitoring purposes only, and does not have a recording facility.

Behavioural Support and Use of Restraints

The safety and well-being of all staff, children and young people is paramount. The promotion of mental health and development of all young people is central to the work of all staff at Chailey Heritage Residential. Positive behaviour management is crucial and is the responsibility of all staff at Chailey Heritage.

Joint, multidisciplinary working, teamwork, mutual support, consistency and communication are essential across Education, Care and Chailey Clinical Services. Communication with and involvement of the young person and their families is essential.

Our Aims

- To promote and support best practice.
- To establish a safe and positive environment throughout the school and residences where young people can learn, and develop social awareness.
- To promote high expectations of positive behaviour from the young person.
- To ensure measures taken to respond to unacceptable behaviour are appropriate to the age, understanding and individual needs of each young person.
- To ensure that staff are trained and can understand and appropriately use individual positive behaviour support plans.
- To ensure that staff are kept safe and that their rights are respected.
- To ensure that any necessary physical intervention or sanction is used safely and appropriately and recorded and followed up correctly.
- To fulfill the National Minimum Standards for Children's Homes — Standard 3 and Regulation 17, 17A & 17B.
- Work in partnership with parents/carers and other agencies

Physical Intervention (restraints)

Many of our young people require physical prompts to enable them to experience and learn new skills and concepts. All of our young people need physical assistance from staff. Staff, parents/carers and young people accept these needs and work within clear boundaries. Physical intervention, mean actions taken by staff to:

1. keep a young person safe from their own behaviours/actions
2. keep others safe from a young person's behaviours/actions
3. defuse or prevent a potentially escalating or dangerous incident
4. avert immediate danger or injury or serious damage to property.

For residential pupils of Chailey Heritage School all A/I forms will be reviewed at the weekly meeting of the Deputy Head, the Quality Assurance Manager and the Head of Residential Operations. If it seems likely that further physical interventions may be needed, it must be considered whether a mental health referral is required with a follow-up conversation with the Head of Residential Operations and Clinical Psychologist from Chailey Clinical Services, our NHS partners.

Staff Training

All relevant staff complete Positive Behaviour Support (PBS), a British Institute of Learning Disabilities (BILD) accredited practice. Positive Behaviour Support focusses on proactive and positive strategies to best support young people's emotional well-being and behaviour with an encouraging and holistic approach.

All young people have a PBS plan as an integral part of their support plan and our PBS advocates work closely with the Clinical Psychologist from Chailey Clinical Services, our NHS partners.

When a young person needs more structured systematic, intensive support for their mental health needs, a referral for an assessment may be required.

Education

Supporting Special Educational Needs

Any time spent on the residences provides opportunities for learning to take place. Young people have a set of targets called 'My Next Steps' which can be found in the individual's support plan and linked to their EHCP. Targets are set with the young person, school teaching team and the young person's residential keyworker and monitored regularly by the teacher. All of the bungalows have a dedicated computer for the young people to use for homework, games, etc.

School Attendance and Promoting Educational Attainment

The majority of the young people who reside on the bungalows attend Chailey Heritage School. Classes are grouped according to age and ability where a broad, balanced and stimulating curriculum is offered.

Chailey Heritage School has developed its own curriculum, driven by the individual learner's needs called Chailey Heritage Individual Learner Driven (CHILD) Curriculum. This means every learner has their own curriculum, built specifically for them based on their skills and desired outcomes. The CHILD Curriculum consists of personalised learner profiles detailing aspirations, strengths, needs, skills, long-term outcomes and next steps.

The profiles are:

- Engagement Support
- Communication
- Physical
- Access Technology
- Social and Emotional Well-being
- Functional Skills
- Powered Mobility
- Subject Specific Learner

Intrinsic to the curriculum is the development of independence and social skills using ICT and assistive technologies.

Staff from Chailey Heritage Residential spend time in class with students from their bungalow, in order to be able to support the young person with their educational targets on the bungalows.

Enjoyment and engagement with learning are central to the ethos and vision of Chailey Heritage School, in addition to working towards each learner's potential at every stage of their education.

Health and Wellbeing

Each young person has a support plan and health record maintained by their keyworker and nursing staff. These are reviewed and updated constantly.

The support plans are written with parents/carers when the young person joins Chailey Heritage Residential. The young person will attend various clinics provided by Chailey Clinical Services (Sussex Community NHS Foundation Trust) and their keyworker attends to support their individual needs.

Partnership with Chailey Clinical Services

Chailey Heritage Foundation works in close partnership with Chailey Clinical Services (CCS), part of Sussex Community NHS Foundation Trust (SCFT). The Trust is responsible for the health governance, including the clinical training of Chailey Heritage Residential staff. The Trust provides a full range of therapists, as well as nurses and paediatric consultants. The young person's funding authority funds clinical fees separately to residential funding.

All professionally registered clinical staff are checked by SCFT to confirm they are registered with their professional body and they maintain their professional requirements to be competent and registered as per our Partnership Working Agreement. Paediatric consultants work in conjunction with us to oversee a child's clinical needs. Other visiting consultants who have outpatient clinics on-site support their work. Each young person has an allocated nurse and nursing support is available on-site at all times.

The consultants work closely with the therapists and the rehabilitation engineers of Chailey Clinical Services who have particular skills in posture management, equipment adaptations and development of tailor made solutions. The Rehabilitation Engineering Service also support the work of our own technicians in the production of bespoke assistive devices and technology relating to mobility and communication.

The young people are allocated a physiotherapist, a speech and language therapist and an occupational therapist, who work closely with the staff and family to create personalised programmes of support both in-group sessions and on an individual basis.

Chailey Clinical Services also provide a Pharmacist, Dentist, Optician and Dietician.

Clinical staff are recruited as long as they meet the individual needs of the role and service for which they are supporting.

Training is provided to ensure that clinical staff are able to keep their registration current, and delivered in a variety of ways with staff accessing national conferences, national working groups, research and university training.

Quality Assurance and Service Development

As an organisation, we are committed on delivering the best quality service, and we are always looking to continually improve what we do. We have a Quality Assurance Manager as part of the senior management team, whose role involves monitoring the service, evaluating and learning from concerns, mistakes and complaints and developing the quality of the service.

As a team, we use Action and Improvement Plans to strategically develop and grow. We listen to and really value input from the young people we support, from families, staff and external professionals to help us improve what we do, and use a variety of tools to collate this information.

Staffing Matters

We aim to develop staff to their full potential, by doing so optimising their contribution to the success of the Foundation and therefore, providing the best care and support for the children and young people staying with us.

Chailey Heritage Residential accesses the Workforce Diplomas externally to provide care qualifications for staff. All support staff are expected to complete the Care Certificate within their first three months.

All new staff (0–3 months) follow a comprehensive Induction Programme and may include Inset Training that is shared between our social care and education staff where appropriate.

Additional mandatory training is required but must be by approval of the line manager who will decide (along with other senior staff and the nursing team, where appropriate) when the member of staff shows that they are ready and able to undertake specific training. ***Please see Appendix I– Mandatory Training***

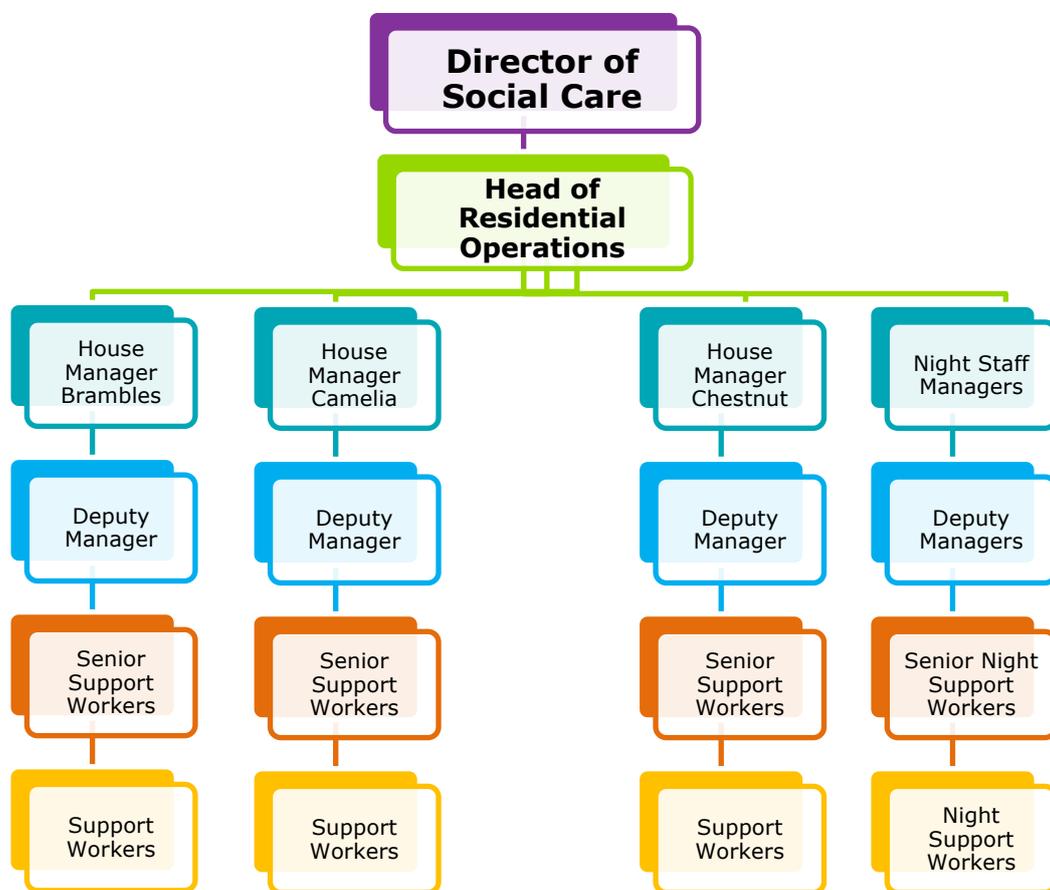

A second period of training (3–6 months) relates to the more specialised areas of duties such as Gastrostomy, Epilepsy, Preparation of Medications and becoming a driver of the mini buses. These practises involve a greater level of knowledge and understanding.

The Human Resources Department leads training proactively. A rolling evaluation of all required training is carried out and the relevant number of sessions booked in order to support those needs as highlighted by the Learning and Development Coordinator. Line managers have full

access to their team’s training records via MyHR, our online Human Resources database. All staff have access to their human resources records also via our online system, MyHR.

Supervision is part of the appraisal process where line managers can support staff members by developing their knowledge and competence. This enables staff to assume responsibility for their own work practices. During supervision, staff are encouraged to reflect on their work practice in order to learn from experience and to improve their competence.

Management and Workforce Structure

Senior Roles and Qualifications

The House Managers have a minimum Level 4 Diploma in Health and Social Care whilst most hold a Level 5 Diploma in Health and Social Care and/or Leadership and Management for Residential Care. With the introduction into the management structure of deputies, the Deputy Managers are working towards their Level 5 qualification to ensure effective and consistent leadership across the residential provision.

All Senior Support Workers hold a Level 3 Diploma in Health and Social Care and have the option to complete a Level 4 Diploma in Health and Social Care. **Please see Appendix II – Senior Roles and Qualifications**

Promoting Positive Role Models of both Genders

At Chailey Heritage Residential, we have a policy of promoting gender equality, and will, depending on the ratio of the males and females residing in a bungalow; endeavour to have a mix of staff genders working with the young people.

Mandatory Training	Care Certificate Modules
<ul style="list-style-type: none"> • Principles of Giving Medication • Preparation/Management of Medication • Gastrostomy • Eating and Drinking • Epilepsy • Powered Mobility • Communication • Basic Life Support / Emergency First Aid • Hand-washing and Infection Control • Food and Hygiene • Manual Handling Theory and Practical • Fire Safety and Evacuation • Fire Precautions and Actions • ICT awareness / E-Safety • Safeguarding Recognise, Respond and Prevent • Mental Capacity Act / DoLS and Consent • Positive Behaviour Support • Data Protection • Multi-Sensory Impairments Awareness • Swimming Pool Hygiene and Safety 	<ul style="list-style-type: none"> • Understand your role • Your personal development • Duty of Care • Equality and Diversity • Work in a Person Centred Way • Communication • Privacy and Dignity • Fluids and Nutrition • Awareness of Mental Health conditions, Dementia and Learning Disability • Safeguarding Adults • Safeguarding Children • Basic Life Support • Health and Safety • Handling Information • Infection Prevention and Control
