World - Weather - Rainbow

World - Water - Drop

Plants

Mealtimes - Flavour - Nasty, Spicy, Sweet.

With follow up questions Mikey told us that he wanted to plant one plant that is nasty, spicy and sweet.

Maybe a spicy sweet pepper?

plants

pepper

Seeds

seeds

World - Flower - Seeds.

Mikey used his CCS book to say he would like to plant more seeds.

TRUFFET PARK

The Sensory Garden

The Sensory Garden at Truffet Park has been developed as a guide to the wonderful variety of plants which nature has adapted in many different ways over the centuries. Some are good to smell or taste, whilst others have a relaxing sound or are pleasant to touch and all are appealing to the eye.

Smell

- Thyme**: Thyme is a herb plant, originally from the mountains of the Mediterranean. It has been used for centuries to flavour food and the essential oil is used in a variety of ways, including in perfumes.
- Black Lavender**: This plant originates from the Mediterranean. The highly scented plant has been used since the earliest of times not only for its fragrance but also as a preservative for foods.
- Mock Sage**: This plant originates from the British Isles and the scented oil of the leaves is the base of many perfumes.

Taste

- Lemon Balm**: Lemon Balm has been used for centuries as a medicinal herb. The essential oil of the leaves is used for its fragrance and also as a preservative for foods.

Touch

- Nectarinum**: Nectarinum is a useful ground cover and can be used to create a soft, cushioned surface. The leaves are soft and velvety to the touch.
- Curry Plant**: If you crush the leaves of the Curry Plant and add a little oil, you will get a strong, spicy smell. The leaves are also used in Indian and Thai cooking. The heads of the plant are made into tea.

Sight

- Banana**: Bananas are a useful ground cover and can be used to create a soft, cushioned surface. The leaves are soft and velvety to the touch.
- Coriander**: The plant has a strong, spicy smell. The leaves are also used in Indian and Thai cooking. The heads of the plant are made into tea.
- Caribbean Hebe**: The Caribbean Hebe is a shrub with a strong, spicy smell. The leaves are also used in Indian and Thai cooking. The heads of the plant are made into tea.
