

The PE and Sports Premium is allocated to primary schools according to the number of pupils of primary school age (5 to 10 years old).

The funding is paid in two separate payments during the school year, one in November and one in May.

The purpose of the premium is to engage all pupils in regular physical activity and raise the profile of PE and sport across the school, as well as broaden the range of physical and sporting experiences.

At Chailey Heritage this has been achieved by enabling everybody easier to have better access to resources required for physical activity. This has helped us progress with our whole-school focus on the physical curriculum for our children, which is vitally important.

The income spent last year exceeds income due to the previous year's roll-over. Moving forward, there will be a surplus of over £6k to roll into 2017-2018. The focus of the grant in 2017-2018 will be the same focus on supporting best access to physical activity.

Total Income 2016-2017: £8139.67

Total Spend 2016-2017: £12 633.88

Break down of spend, with impact RAG rated:

Rebound	
Training	£369.23
Equipment: Wedges, pillows, mats etc	£405.72
Impact	
Every pupil who is able to access the trampoline, over 2/3 of pupils, has now completed at least one round of rebound therapy. The beneficial impact on the children has been so significant that we have already trained Little PICL to be able to deliver rebound and are looking forward to being able to use two	

trampolines when the DREAM centre is built, so that therapy can be delivered continuously through the year and not in blocks.	
PICL	
Inclusive Dance training	£746.56
Impact	
This training was due to be completed at the end of the summer holiday, but the course was postponed and PICL has now been allocated a place in 2017-2018 although paid for in 2016-2017. Once complete PICL will be setting up activity sessions across the site now that Little PICL is able to lead some rebound sessions.	
Seymour	
Equipment: class set of equipment and therapy benches	£1870.62
Impact	
<p>This had a direct impact on one class group in Seymour who were of eligible age. It ensured that 'sit to stand' style activities similar to those used in St Martin's box group could continue for students when they moved to Seymour. This enables students to work on their core strength and balance, which was a particularly important focus for one cohort of students last year.</p> <p>Some other equipment purchases meant that eligible class teams had full sets of therapy rolls, mats and wedges so they did not need to share a central stock, so enabling education and therapy to take place without delays or problematic timetabling. This also relieved pressure on the centralised departmental resources for other students to benefit from. Some padded physio helmets were also purchased which increased the combinations of students who could go biking together rather than having to wait for a share helmet. As a bonus, this has increased the social aspect of biking as well as just the physical.</p>	
St Martins	
Equipment: class sets of equipment	£4983.45
Impact	
Each class in St Martin's including the new fifth classroom now has immediate access to floor mats, peanut balls and wedges etc. this has been a very positive move since it saves so much time for staff having to share, look for	

and wait for equipment, it enables learning and freedom to physical activity when appropriate rather than having to wait for specific time frames.	
Aquatics	
Equipment:	£93.30
Impact	
The aquatics facility have benefitted from new neck collars and underwater flashing lights. The neck collars are used daily to support heads and to support floating and independent movement in the pool, while the flashing light is use for encouraging movement in the water as well as for object tracking.	
Large equipment	
Hand bike contribution	£1624.00
Grillo walker	£2541.00
Impact	
<p>The hand bike is used several times a week by one student in St Martin's for whom there wasn't a suitable bike/trike in the Chailey stock. Donations part funded the purchase but at the time was unable to fund the whole bike, since the pupil is of eligible age the PE and Sports grant fund the rest of the bike to enable this student access to physical activity.</p> <p>The Grillo walker is a size and make of walker which was in Chailey stock but was being shared by numerous other students which meant delays in access to the walker and then resetting the posture for each student. Since purchasing a new Grillo the pressure on the walker has been halved and it is now much more available when required and can be used when the students are well enough to walk and are able to do so several times a week rather than because it is their specific allocated time to walk.</p>
